

# insureyour VILLAGE HALL

## Another Satisfied Customer!

At Insure Your Village Hall, we aim to save you money whilst making the process of obtaining a quotation and taking out a policy as simple as possible.

We like to think that we achieve this aim but don't just take our word for it. Here's what a new client had to say recently:

*"Insurance has become one of the biggest costs for organisations running village halls and community centres.*

*Re-build costs for such community buildings are now very high and the activities taking place within them are many and varied. Providing appropriate insurance cover is therefore quite specialised which limits the number of providers of such insurance and keeps premiums high.*

*So this year I looked around several insurance brokers for a better deal for our Community Centre.*

*Thanks to an introduction from Community Action Northumberland I was able to contact Ed Huston of Precision Partnership and through their 'Insure Your Village Hall' package we were able to agree insurance cover which perfectly matched our requirements.*

*Getting the right insurance is even more important than the cost (you find that out if you have to make a claim) and I had left it a little late to begin my search so our renewal date was very close.*

*However all the paperwork was completed very professionally in less than a week - and we saved over £600 on the renewal premium from our previous insurers.*

*Needless to say both I and my board are delighted with this outcome.*

***I am not the sort of person who easily recommends anything to anyone but if you are involved with running a village hall or community centre then, when your insurance is due for renewal, you should definitely see what 'Insure Your Village Hall' can offer you."***
